## Renoir: The Body, The Senses

### Through January 26, Kimbell Art Museum

Over the course of his long career, Pierre-Auguste Renoir continually turned to the human figure for artistic inspiration. The body—particularly the nude—was the defining subject of Renoir's artistic practice from his early days as a student copying the old masters in the Louvre to the early twentieth century, when his revolutionary style of painting inspired the masters of modernism. In recognition of the centenary of Renoir's death, the Clark Art Institute and Kimbell Art Museum present *Renoir: The Body, The Senses*.

This daring exhibition is the first major exploration of Renoir's unceasing interest in the human form, and it reconsiders Renoir as a constantly evolving artist whose style moved from Realism into luminous Impressionism, culminating in the modern classicism of his last decades. For more information, visit [www.kimbellart.org](http://www.kimbellart.org).

## Portraits: Photography by Dennis Hevia

*Through February 23, Arlington Museum of Art  
201 West Main Street, Arlington, TX 76010*

Modern photography has given the masses the ability to create images for pleasure and for the documentation of their lives and the world. Although the technology has changed, the concepts that guide classic portraiture have changed only a little.

Whether you are an artist skilled in the use of physical mediums like brushes and paints, or a photographer using the most modern of digital technologies, understanding light is still key.

The masters of the Dutch Golden Age (which spanned basically the 17th century) saw the emergence of artists like Vermeer and Rembrandt. This exhibit, "Portraits" is the artist's attempt to pay homage to some of the old masters. For more information, visit [www.arlingtonmuseum.org](http://www.arlingtonmuseum.org).
